

ARE YOU INTERESTED IN INCREASING THE WATER HOLDING CAPACITY OF YOUR SOIL?

Walter Jehne is an internationally recognised climate scientist, soil microbiologist and innovation strategist.

Walter will provide information on ways to increase efficiency of the hydrological cycle in soils to increase the growing season and maintain moisture in the soils.

Will provide an understanding of options available to improve the soil structure for an increased water holding capacity.

Join Walter and his associate Phill Lee at a workshop on Thursday 4th March to learn about techniques to improve our soils to operate as a “sponge”.

When: 9.30 to 3.30 on Thursday 4th March

Where: Sherbourne Terrace, Shepparton

Registrations: <https://www.trybooking.com/BOZEZ>

Cost is \$40 which includes lunch

This project is supported by the Goulburn Broken CMA, through funding from the Australian Government's National Landcare Program.
