

“Resilience in a Changing Climate”

A workshop with Walter Jehne

Walter Jehne is an internationally recognised climate scientist, soil microbiologist and innovation strategist. He has immense field and research experience in agriculture and soils at both a national and international level. This diversity of experience has given Walter a unique and exceptional capacity to devise solutions – he can turn a challenge into an opportunity. With a unique ability to explain complex science and economic paths forward in easy to understand ways, Walter’s workshops are always informative and accessible.

Walter and his associate Phill Lee, will be holding this workshop on the farm of innovative farmer Paul Oxbrow.

When: Tuesday 9th March 9.30am – 4.30pm
Where: 244 Millers Road, Rupanyup South
Cost: \$40
Bookings: <https://www.trybooking.com/BOTCQ>

This project is supported by the Wimmera CMA, through funding from the Australian Government’s National Landcare Program.
